The screenshot displays the Android Studio IDE. On the left, the 'Project' and 'Resource Manager' toolbars are visible. The main editor shows the `MainActivity.java` file with the following code:

```

1 package com.example.mybottomnavigation;
2
3 import ...
4
5 public class MainActivity extends AppCompatActivity {
6
7     private ActivityMainBinding binding;
8
9     @Override
10    protected void onCreate(Bundle savedInstanceState) {
11        super.onCreate(savedInstanceState);
12
13        binding = ActivityMainBinding.inflate(getLayoutInflater());
14        setContentView(binding.getRoot());
15
16        BottomNavigationView navView = findViewById(R.id.nav_view);
17        // Passing each menu ID as a set of IDs because each
18        // menu should be considered as top level destinations.
19        AppBarConfiguration appBarConfiguration = new AppBarConfiguration
20            (R.id.navigation_home, R.id.navigation_dashboard, R.id.nav
21            .build());
22        NavController navController = Navigation.findNavController( activity
23            NavigationUI.setupActionBarWithNavController( activity: this, navConti
24            NavigationUI.setupWithNavController(binding.navView, navControlle
25    }
26
27 }
28
29 }
30
31 }
32
33 }
34
35 }
36
37 }

```

On the right, a preview of the app's home screen is shown. It features a purple header with the text 'Home', a white body with the text 'This is home fragment', and a bottom navigation bar with four icons: a home icon, a dashboard icon, a notification icon, and a profile icon. A 'Launch succeeded' message is visible at the bottom of the IDE.
